SUMMARY

Cloud infrastructure engineering student at TEK-UP University seeking a summer internship in cloud infrastructure, cloud architecture, DevOps or infrastructure engineering. Deployed a highly available multi-AZ AWS architecture with load balancing, Auto Scaling and Multi-AZ databases, and worked on a three-tier VPC built with Terraform. Bachelor's degree in Information Systems Development, graduated with honors.

SKILLS

Cloud Infrastructure: AWS (EC2, VPC, S3, EBS, RDS, ElastiCache, DynamoDB, EFS), OpenStack, Terraform (IaC), Linux, Docker, Podman

Cloud Architecture: load balancing (Application Load Balancer), Auto Scaling, high availability, multi-AZ design, RDS Multi-AZ, three-tier VPC, NAT gateway, security groups

Programming: Python (Boto3), Java, PHP, JavaScript, TypeScript, SQL, HTML, CSS, Git, GitHub

Frameworks and APIs: NestJS, Next.js, Laravel, FastAPI, Bootstrap, REST APIs, JWT

Networking and Data: BGP, OSPF, ACLs, Cisco Packet Tracer, PostgreSQL, MySQL

PROJECTS

Highly Available Messaging Architecture on AWS | AWS Learner Lab project — Oct 2026

- Deployed a multi-AZ three-tier architecture in us-east-1: VPC with public and private subnets across two Availability Zones, NAT and Internet gateways, and one security group per tier.
- Configured an internet-facing Application Load Balancer with health-checked targets in front of an Auto Scaling group (2 to 4 instances) in private subnets; verified traffic distribution across both zones.
- Provisioned RDS MySQL Multi-AZ, ElastiCache Redis with a replica and automatic failover, encrypted EFS shared storage and a DynamoDB table for message history.

Art Gallery on AWS | Team project (2 developers) | github.com/AjmiOns/art-gallery-aws — Oct 2026

- Developed the full-stack art marketplace with Next.js, NestJS and PostgreSQL: user authentication, artwork publishing and browsing, and a Stripe test-mode checkout.
- Collaborated on the Terraform infrastructure (network, security and compute modules): three-tier VPC across two Availability Zones, Internet and NAT gateways, S3 endpoint, bastion host and private EC2 backend; documented the target high-availability architecture.

CineBot AI | Solo project | github.com/AjmiOns/CineBot-AI — Aug 2026 – Oct 2026

- Built a hybrid retrieval-augmented generation (RAG) movie assistant (FAISS, BM25, Groq Llama 3.1, TMDB) with personalised ranking, a Laravel and FastAPI chat interface and Docker packaging.

Folio Library | Solo project | github.com/AjmiOns/folio-library — Oct 2026

- Built a NestJS REST API (JWT, role-based access, TypeORM, PostgreSQL) with a Bootstrap and Chart.js front end: catalog, favorites, trash and restore, and an admin dashboard.

Android To-Do List App | Solo project | github.com/AjmiOns/todolist-android-app — Aug 2026 – Oct 2026

- Developed an Android task manager in Java with Retrofit and a PHP/MySQL REST API (register, log in, add, edit, complete tasks).

EXPERIENCE

IT Intern | SicCad Engineering, Le Kef, Tunisia — Feb 2025 – May 2025

- Designed and developed an e-commerce mobile application with a web dashboard built with Laravel.

IT Intern | Centre Privé de Formation en Informatique (CPN), M'Saken, Tunisia — Jan 2024 – Feb 2024

- Developed an e-learning platform with HTML, CSS, Bootstrap and MySQL.

EDUCATION

TEK-UP University | Engineering Degree in Cloud Infrastructure Management — 2025 – 2028 (expected)

- **Relevant coursework:** cloud infrastructure (AWS, OpenStack), Linux containerisation, networking (BGP, OSPF, ACLs), AWS automation (Boto3).

ISET du Kef | Bachelor's Degree in Information Systems Development — Graduated 2025

- Graduated with honors; final-year project graded Very Good.

CERTIFICATIONS

AWS Certified Cloud Practitioner (in progress) | AWS Certified Solutions Architect – Associate (in progress)
